Trusted information to help you recovery from a disaster

A Guide to Disaster Recovery for Coloradans

After a disaster, it can be hard to know what the steps to take and how to prioritize. The Colorado Disaster Recovery Navigation Tool, provides trusted information, practical guidance, and resources in one always available, easy-to-use location. Developed with input from disaster survivors and guidance developed with trusted recovery partners, the tool brings together information and resources to support you through recovery.

Key Features

- **My Journey:** Choose the recovery journey that best fits your situation. Information is organized around common recovery actions and to help you make informed recovery decisions, including what to focus on at different stages of recovery.
- **Step-by-Step Checklists:** Each stage of the journey includes easy-to-follow checklists to help you stay organized and understand what to do next. These checklists follow the actions in the My Journey portion of the tool to help you stay organized.
- **Best Practices:** Find practical tips to help you through the recovery process on topics including how to avoid getting scammed, tracking expenses to help you get the insurance and financial assistance you deserve, documenting damages, and working with contractors and volunteers.
- **Interactive Resource Database:** Provides information and links to additional information that you can explore through the website or download. Resources range from guidance on safely removing debris and replacing documents to working through insurance claims and accessing assistance programs.

Designed for Colorado Survivors

- Always available
- Written in plain language
- Developed with survivor input and reviewed by trusted recovery partners
- Brings together information and resources from across Colorado in one place
